Skills

Programming[proficient]: Java, JavaScript, JSP, EasyUI [familiar]: Vue, Angular, BootStrap, JQuery, HTML, CSS.
Database: MySQL, SQL Server, Oracle.
Frameworks & Tools: Spring Frameworks, Hibernate, MyBatis, Maven, Redis, ElaticSearch, Kafka, RocketMQ.
Version Control & Testing: Git, SVN, Cucumber, TDD & BDD.
Other: Azure, AWS, Jira, Sprint & Scrum, Docker, Kubernetes, Zookeeper, Nginx, Linux, Jenkins.

Employment & Projects

Infosys Ltd.   **Guangzhou, China**
Senior Software Engineer   *May 2022 - Present*

○ **HSBC's PayMe**
  * **Summary: Developed Java mobile interfaces and Angular web services for HSBC's PayMe project, enhancing the experience for over 3 million users.**
  - Developed HSBC credit card fee feature for PayMe, **saving $300,000 monthly in top-up fees** and influencing user behavior towards preferred payment methods;
  - Implemented PayMe's auto-trigger feature, markedly reducing customer complaints and enabling next-day voucher fulfillment, significantly increasing daily P2M transactions;
  - Streamlined web system setup with Angular, automating SQL tasks and significantly enhancing efficiency;
  - Boosted data sync efficiency, reducing process time from 2 hours to 10 minutes, **nearly a 90% improvement**;
  - Executed a complete service migration from Azure to AWS, ensuring uninterrupted business continuity.
    <u>Utilized</u>: Spring, MyBatis, Angular, Redis, Kafka, SQL Server, MySQL, Azure, AWS, Jenkins.

WeiNing Health Co., Ltd.   **Guangzhou, China**
Software Engineer   *Oct 2021 - Apr 2022*

○ **WeiNing Healthcare Information System**
  * **Summary: Developed a Hospital Management platform using Java and Vue, enhancing hospital processes and system integration.**
  - Implemented message queue and sent SMS or email to nurse station using Kafka asynchronously;
  - Improved concurrency efficiency and realized database synchronization with ElasticSearch;
  - Optimized SQL scripts and leveraged Redis caching, achieving nearly double the print preview loading speed;
  - set up a reliable distributed configuration center with Apollo in a week to accelerate deployment.
    <u>Utilized</u>: Spring, MyBatis, BootStrap, ElasticSearch, Redis, RabbitMQ, SQL Server.

YaMei Information Technology Co., Ltd.   **Guangzhou, China**
Java Developer   *Apr 2019 - Apr 2021*

○ **YaMei Human Resource Management System**
  * **Summary: Developed the Office Automation system to optimize and automate business processes and procedures independently with Java.**
  - Integrated third-party platforms to streamline core processes, significantly boosting work efficiency;
  - Imported OpenOffice to convert Excel or Doc files into PDF and realize online preview securely;
  - Designed a custom drag-and-drop framework to reduce GUI development time significantly.
    <u>Utilized</u>: Spring, MyBatis, Vue, Redis, MySQL, OpenOffice, SVN, Jira.

GuangDianYinTong Technology Co., Ltd.   **Guangzhou, China**
Junior Software Engineer   *Jul 2016 - Jun 2018*

○ **YinTong Office Automation Collaboration System**
  * **Summary: Developed HR and Mobile Approval system for streamlined human resource management.**
  - Optimized approval workflows with JBPM, boosting efficiency and lowering labor costs;
  - Implemented single-sign-on protocol (CAS) in the system to provide access control across multiple applications;
  - Visualized official data with different charts using the Echart tool to increase HR productivity.
    <u>Utilized</u>: Spring, Hibernate, EasyUI, JQuery, Apache Shiro, JBPM, Echarts.

Education

Tianhe College of Guangdong Polytechnical Normal University   **Guangzhou, China**
Bachelor of Computer Science Engineering   *Sep 2012 - Jul 2016*
